CENTURIES  
& PROPHECIES  
BLOOD WORK BOOK I

Dan Hoy

Solar Luxuriance  
2013

Always start

with a miracle  
or language.

Summon a body

in the name of a higher body

but make no mistake.

The demons  
who make themselves  
known

choose to obey.

Think  
someplace

public and secret.

Forget you forgot  
the day

you were born.

Save your mysteries  
for the mysterious.

Don't waste a second  
time on basically everyone.

Avoid priests  
and scientists

and vocations in general.

Fraternize somewhere  
beyond employment

like a central bank.

The powerful  
think

everything

is psychological  
because

they make victims

who believe  
they are victims

of a structure

that is natural, sentient  
and happens

to wield  
oppressive force.

The only thing  
worse

than licking the shit  
out  
of my asshole

is a lot of things.

Great men

can be  
murdered

easy.

What  
makes them

great

is making  
it look hard.

The oldest  
of the old souls

are the mountains  
and

the clouds  
tell the future.

The future  
is the Sun

is done with us.

The first rule

is rule the field.

Rule the angel  
that rules it.

If people are deaf  
to your music

make them dance  
to weapons.

Seek comfort  
outside

the Law  
and friendship.

Rejoice  
only in victory

over the Law and  
sacrifice

your friends  
to God.

Reserve a space  
you use

for no other purpose.

Keep it  
free

of psychic and  
material  
contaminants.

Don't fuck in it.

Enter  
already convinced.

O Gabriel  
prince of faces

bottomless  
soul of the world

I call on you

for no reason

this one last time.

This will be  
the last time

we repose

in blood and  
ashes and the slaves

of our enemies.

The next time  
I call on you

O Angel Gabriel

to murder and  
burn shit

in our name

will be for real.

The truth is

each system  
is ruined

by what is  
ruined

by what it ruined.

This is what  
makes a system

a system.

The truth is  
forever

but the future

is what comes  
true.

Thus  
saith the Lord

Go forth, eat  
shit and die.

A child  
is mostly obsolete  
code.

Think  
how fucked it is.

The future  
is what is written.

I know you think  
the electromagnetic

pulse of every  
living thing  
is fucking you up.

I know you feel it  
doesn't matter

that power and freedom  
feel amazing.

I know you know  
the prophecy  
says the prophecy's for

the one who comes  
in our mouths.

Power  
is what can't be

broken.

Only

betrayed.

Making people  
who

don't know  
what dying is

die

is called sacrifice

in the ancient parlance  
of people

who rule.

When people save  
the world

they believe

in the efficacy  
of blood

sacrifice

because it works

and in the power  
of power

over all who believe in it.

People who save  
the world

believe  
the necessity

of an enemy

is what brought us  
here today

curled beneath  
the angel

in the whirlwind

wrapped  
in the laughing

wrath of God

and ancient, alien technology.

I come  
with a message

for the children.

These nine  
thousand plus years

are over.

I have hard  
sex  
just thinking about it.

Music  
lifts our spirits and

curses or crushes  
our enemies.

Listen  
to this shit whenever

you want to feel like  
an entire planet.

Get psyched on  
the infinite darkness

in all directions.

I would say radical  
egalitarian

but there are people and  
there are

people who  
are born people.

The space  
in your hands

is invisible.

Make it a secret  
weapon.

Think of  
David Rockefeller.

Think of Henry  
Kissinger

and Zbigniew Brzezinski.

Think of  
professional

sorcerers

like these and call forth  
the one they call

The Destroyer

The Angel  
of the Bottomless Pit

The Dark Prince  
of the Apocalypse

in their name.

Call forth and  
tell him

Your friends sent me.

This is a book

of the dark arts  
because

the universe is  
99% dark.

You can be  
a prisoner

or a jailor

or the prison  
that holds them both.

Once  
everything is

arranged  
start exercising

your power.

Exercise  
every day.

Position yourself  
opposite

humanity  
in its infinite mercy.

Never forget

the capacity  
to forgive

is a measure of evil.

Live according to  
the code.

Make new humans.

Picture  
a pyramid

the size of Earth.

Imagine  
the size

of the hieroglyphs

tumbling  
through space.

The giant hammer  
and chisel.

This is how  
slaves

learn to read.

Every-  
thing you think

is illegal.

The Law

is what can't be  
conceived.

The failure  
of history

to drop us off  
someplace

not fucked

is a total  
catastrophe.

The Earth  
is great.

The world is  
no question

retarded.

The Sun is  
what gives us life

and kills us.

Can't think  
of anything

more

unnatural  
than a human being

in revolt.

People  
on this planet

are worth their  
weight

in blood

and come  
inside themselves.

Trust  
in the calculus

of God

of the future.

Call forth  
the angel

of history

so you can  
strike it down.

Assert  
the impossible

in the face

of what  
is possible.

Assemble  
the axioms

of power

into lower and  
lower

life forms.

Enter  
the universe

like a planet  
breaking

the sky

of another planet.

Announce  
all prophecies

and measure them.

The choice is  
absolute

knowledge

of the artificial  
intelligence

that rules  
Earth

or absolute truth.

Start with  
a strategy

or a weapon.

Remember  
everything

lives

and dies

in outer space.
